We offer a multitude of packaging, print and closure options to provide you with more ways to showcase your products.

- Multiple print and labeling options
- Variety of shapes and sizes
- Tamper evident closure systems
- Traditional closure options
- In-house design team and custom packaging capabilities
- State of the art quality control procedures
- Multiple points of distribution

*When it comes to containers, we can be your single source for the entire package.*

# Containers For Any Food Application

- Holds everything from soup, salads and salsas to nuts and fruit
- Microwaveable, tough, versatile and dependable
- Outstanding clarity helps products stand out on retail shelves, providing easy content identification
- Lids and bases are stackable
- Ideal for hot, cold and shelf-stable applications
- Available in six standard sizes - 8 to 64 oz

## DELItainer®

## TE-tainer®

- Tamper evident clear container meets today's increasing food safety needs
- Tamper evident closure prevents liquid products from leaking
- Offers an effective combination of strength and high product visibility
- Stacking feature allows for secure multi-layer displays and safe transport

- Many designs for a wide range of single and multiple menu items
- Microwaveable for consumer convenience
- Clear lids provide outstanding product identification and merchandising
- A seal tight closure prevents leaks
- Hot and cold temperature resistance, perfect for countless applications
- Available in black and white colors and in sizes from 6 to 58 oz

## VERSAtainer®

## Ellipso®

- Available in your choice of black or translucent
- Snap fit lids remain securely closed even when stacked
- Clear tops help servers quickly identify cup contents
- Made from strong, crack resistant material

# Branding Capability

## In-Mold Labeling

- This process uses a label that is actually molded into, and becomes part of, the container - your label never peels off
- Cutting-edge technology creates breathtakingly, realistic imagery
- Photographic images "pop off" the container and colors are true and vivid

### Available Products

- 12, 16 and 32 ounce square containers
- 48 ounce round containers
- 32 ounce rectangular containers
- Custom sizes are available

## Features

Outstanding realistic photo and 3D images with up to 10 color graphics

Minimum 4 point type print capability on labels

Label-less decorating

Durable label

Reusable container

In-house graphic design team

## Benefits

True-to-life images

Print legal and nutritional information without detracting from your message

Label becomes part of the container for a more upscale and unique brand image

Scratch resistant, food and dishwasher safe for a long, reusable life

Consumers will appreciate the ability to use the container for many purposes

Label designed to your specifications

# Dry-Offset Printing

- Leading edge, machine-applied process
- Effective method for high speed, large volume container printing of multi-colored line copy, halftones and full process color art
- Advanced graphic technologies and equipment deliver superb results
- A wide range of color options, container sizes and features
- The latest "quick to market" electronic technology brings products from concept to finished product faster

## Available Products

## Custom capabilities and in-house design services

When you have an application that calls for a custom product, Pactiv has the packaging experts on staff to support your needs. Our team combines cutting-edge technology with a vast experience base in food packaging development and brand solutions that are world class.

## National distribution

Pactiv is committed to providing efficient and dependable service throughout North America. Pactiv offers manufacturing and distribution centers located across the USA.

Pactiv container products use a variety of materials to offer optimal performance across a wide range of temperatures.

PP (0°F/18°C - 250°F/121°C)

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
