Bakeables Use Instructions

Cooking Temperature for Bakeables Containers: 400°F or less. **Note:** Oven must be preheated prior to use.

Use Instructions: Containers can be used in conventional or microwave heating. Package may become brittle when frozen. If shipping frozen, stack and layer dividers in shipping carton are recommended. Contact Reynolds Food Packaging to review special, modified blends.

Conventional Oven Heating: Preheat oven before placing container inside. Remove cover before heating. Place container on cookie sheet in center of oven. Allow container to cool for several minutes before handling to avoid distortion. Temperatures and heating times vary with each oven; test with food application before marketing. Covers are designed to fit containers after conventional heating unless stated.

Packages should not be used in toaster ovens.

Microwave Heating: Loosen cover before heating, cover can be used to prevent splashing. Cover may experience some distortion during microwave heating. Heating times may vary with oven size; test with food application before marketing.

For end use directions, please contact Reynolds Food Packaging.
